*“Building a great website just got easier “*

Essential Website Creator – 92%

*“A comprehensive and powerful web-authoring tool, yet incredibly simple to use”*

Windows XP Made Easy

## Create Your Website in 3 Easy Steps

1. Choose from one of over 500 professionally-designed templates, or create your own from scratch.
2. Customise your design with images, text, music, and videos. Edit text, colours, images, fonts and layouts.
3. Publish your website in just a few clicks – WebEasy automatically creates the HTML code for you.

## More Than Just an Online Website Creator

With WebEasy, you design your website locally, giving you loads of great benefits:

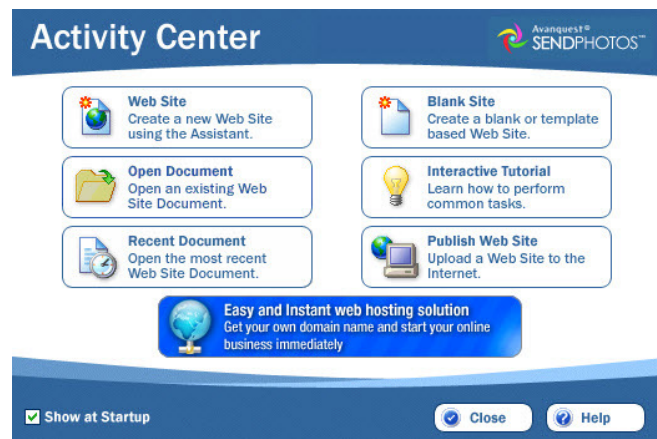

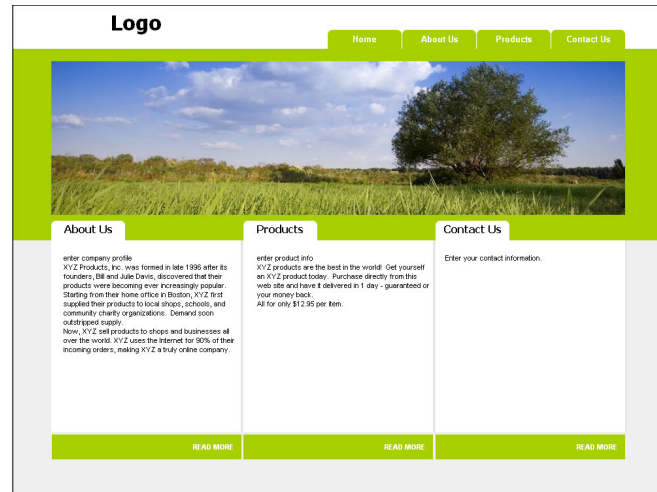

- Create websites whilst you travel or in a meeting without being internet-connected.
- Don't let your design process be ruined by slow internet connections or dropouts.
- Preview your website locally to see how it will look when published.
- Create as many websites as you like with WebEasy!

## Easy Customisation

- Simple drag'n'drop editing - add images, forms, gadgets, music and videos directly into your design.
  - Customise page elements such as title, navigation menu, footers, headers, and more for a consistent theme.
  - Impressive Flash animations add visual sophistication and impact to your website.
  - Automatically compress, convert and optimise images to speed web page loading without sacrificing quality.
  - Add web-based digital content including photos, buttons, backgrounds and clip art from a 85,000 piece multimedia library.
  - Create Web page photo albums to share favourite photos.
  - Create podcasts for video, music, news etc to host on your site
- WebEasy does it all automatically.

## E-Commerce and Search Engine Optimisation

- Create and maintain an e-commerce site with tools and graphics for shopping carts, credit card processing etc.
- Bring more visitors to your website with search engine optimisation tools to maintain, promote & analyse your website
- Promote your products on eBay – Easily generate web pages with the eBay Web Design Wizard.

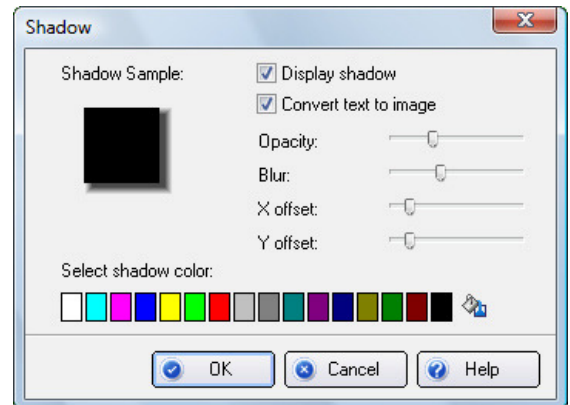

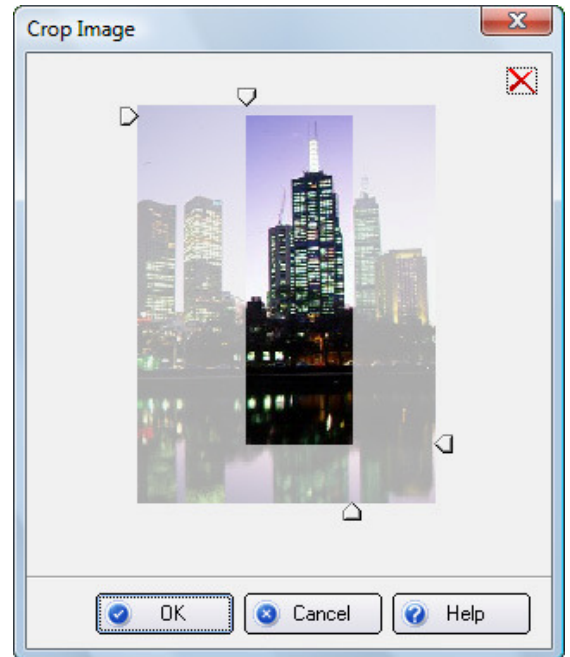

## What's New in Version 8?
